

WORK EXPERIENCE

NGINX

San Francisco, CA

Software Engineer 1

Sept. 2023 - Nov. 2025

Software Engineer 2

Nov. 2025 - Present

- Developing the front-end and CI/CD for our NGINX enterprise documentation site using **Hugo**, vanilla **Javascript**, **HTML** and **CSS**, and **Github Actions**.
- Developing the front-end of our F5 XC documentation site using **NextJS**, **MaterialUI**, and **MDX**.
- Developed the front-end for our NGINX One Config Assistant chatbot using **React**, **Styled Components**, **Vite**, and **Vitest**.
- Leading initiatives around dependencies such as **Adobe Analytics**, **Coveo**, and **Qualtrics**. This includes developing, maintaining, and frequent cross-collaborating with external teams for alignment.
- Improved site reliability by building automated monitoring and alerting workflows, writing runbooks, building robust code testing, and contributing to site infrastructure architecture decisions.

BMW Group

Mountain View, CA

Software Engineer Intern

Jan. 2022 - Jun. 2022

Jun. 2023 - Aug. 2023

- Developed a cross-platform connectivity solution enabling media sharing from **iOS** devices to **Android**-based head-units via **Bluetooth Low Energy**.
- Contributed to filing a **published patent** for the underlying methods and in-vehicle interaction for the above project.
- Improved decade-old vehicle checkout web app to use modern and easier-to-maintain tools like **React**, **Styled Components**, **Express** with **TypeORM**, **MinIO**, and **PostgreSQL**, all deployed with **Docker**.

F5

San Jose, CA

Software Engineer Intern

Jun. 2022 - Sept. 2022

- Developed a shared front-end library used by NGINX product teams for common components using **React** and **Styled Components**.
- Contributed to writing automated E2E and regression testing for NGINX Instance Manager using **Playwright** and **Jest**.

PROJECTS

Portfolio Website — *Vite, Tailwind, ThreeJS:*

- Publicly hosted web app utilizing **Vite** and **Tailwind** as the foundation, and **ThreeJS** and **React Spring** to provide the interactions and fluid animations.
- Built automated CI/CD for app building and testing, and integrated **pre-commit** hooks for consistent upstream development.

All Keys — *Swift, UIKit:*

- Published iOS app (now taken-down) for a password manager with auto-fill.
- Leveraged Apple's Keychain Services to securely store credentials using AES-256-GCM encryption.

HalfModalViewController — *Swift, UIKit:*

- Published **CocoaPods** for a highly customizable half-modal view controller for **UIKit**.

SKILLS

Languages: Typescript, Javascript, CSS, HTML, Swift, Python

Technologies: React, NextJS, Hugo, Vite, Playwright, Docker, SwiftUI, UIKit

EDUCATION

Texas A&M University

B.S. in Computer Science

College Station, TX

Aug. 2019 - Aug. 2023
